DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 8-10; 27; and 40, drawn to the generation of a belief map, classified in class 382, subclass 173.
 - II. Claims 11-14; 20-26; and 31, drawn to the extraction; decompression; and recompression of the data, classified in class 382, subclass 232.
 - III. Claims 15-19, drawn to wavelet decompression usage, classified in class 382, subclass 240.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as use in creating cropped images by choosing the central feature of the image based on a belief map, which is not required by inventions II and II. Similarly, inventions II and III contain respective subject matter that is distinct and separately usable from the other inventions. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II or III, restriction for examination purposes as indicated is proper.
4. Claims 1-7, 28, ad 29 are linking claims that link inventions I-III, therefore they will be considered regardless of the elected invention.
